5'33"

Idea: "Memphis" style beat tape.

recipe by my friend Walter p99 Arke\$tra:

bpm 60 to 70 (or double)

- continuous 16th note hihat, i.e. zzz-zzz-zzz-zzz without much variation
- easy to play melodies, two tones right next to each other create the dark vibe
- there is definitely a classic 808 kit on the Roland
- I think recording on tape etc is always good, otherwise try to turn down the highs, that gives the lofi vibe.
- definitely snare rolls at the end of 16 bars or so
- incorporate chants, i.e. rhythmic vocals, into the drumbeat
