Sound Localization -
educational radio play

with

Çağla Gillis (voice,
percussion)

Sashe Urdovski (voice,
percussion, guitar,
sound engineering)

This radioplay fools you both in title and subtitle: a) instead of locating the listener acoustically, the mix of and layering of different takes and stereo channels is challenging and disorienting; b) the radio play is not educational in the sense that knowledge is imparted. Instead, the radio play asks listeners to create themselves.
